### **Claim Status**

Claims 8 and 13-15 were canceled. Claims 1-7, 9-12 and 16-21 remain for examination wherein claims 4, 5, 9, 11, 12 and 16 are amended and claims 20 and 21 are new.

### **DETAILED ACTION**

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, and 9-11, are drawn to the composition of a desulphurizing agent, classified in class 75, subclass 303.
- II. Claims 12, and 16-21 are drawn to a method of using the desulphurizing agent, classified in class 75, subclass 570.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product can be practiced with another materially different product, such as magnesium granules.

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

A telephone call was made to Jose Flores-Morales (011-528-81-377-3980) on October 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathleen A. McNelis whose telephone number is 571-272-3554. The examiner can normally be reached on M-F 8:00 AM to 4:30 PM.
